A COMPLETE EYE DROP DELIVERY SYSTEM FOR PEOPLE WHO HAVE DIFFICULTY SELF ADMINISTERING EYE DROPS
INSTALLING EYE DROP BOTTLE

1. If bottle is new, remove protective seal(s).

2. Open eye piece towards arms.

3. Place dispenser on flat surface and SPREAD ARMS OPEN. Push eye drop bottle into dispenser until base is fully depressed.

4. Snap eyepiece closed. (The bottle stays in Dispenser until empty. Repeat installation only on receipt of a new bottle)

INSTRUCTIONS FOR USE

1. Open eye piece and remove bottle cap. Close eye piece. Eye piece rotates left or right for most comfortable administration.

2. While sitting back or lying down, tilt head back and place eye piece securely over eye. Eye piece has finger space for pulling down lower eye lid with free hand.

3. GENTLY squeeze arms of dispenser to instil eye drop(s): one drop per squeeze.

YOUR DISPENSER IS NOW READY FOR USE

KEEP DISPENSER IN COOL, CLEAN PLACE FOR NEXT USE
